

Don't turn a blind eye: Every day lives are lost at work

WHO (World Health Organization) estimates that 2.1% of all deaths and 2.7% of the disease world-wide can be attributed to occupational risks. Thus, actions towards healthier and safer workplaces will contribute to improve and protect the lives of millions around the world.

According to ILO (International Labour Organization) estimates, every year over 2.3 million persons die from an occupational injury or disease. Over 350,000 deaths are due to fatal accidents and almost 2 million deaths are due to fatal work-related diseases. In addition, over 313 million workers are involved in non-fatal occupational accidents causing serious injuries and absences from work.

Almost 4% of the world's annual GDP is lost due to incidents which could have been prevented.

- The construction industry has a higher than average rate of accidents.
- Younger and older workers are particularly vulnerable.

Prevention is not a cost, but an investment. It pays off.

According to the research project by the International Social Security Association (ISSA), the German Social Accident Insurance (DGUV) and the German Social Accident Insurance Institution for the Energy, Textile, Electrical and Media Products Sectors (BG ETEM), spending on occupational safety and health is an investment that "pays off" for companies. The Return on Prevention (ROP) is assessed to be 2.2.

SAFETY

HEALTH

WELL-BEING

Well-being: The key to a sustainable future for everyone

CONSTITUTION OF THE WORLD HEALTH ORGANIZATION

“Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.”

Workers well-being is a key factor in determining an organisation's long-term effectiveness. Many studies show a direct link between productivity levels and the general health and well-being of the workforce.

Well-being at work contributes to productivity, but also to a positive climate that transforms a passive productivity into a creative and proactive world of work, where workers and managers collaborate and take active steps to protect and promote the health, safety and wellbeing of all workers and thus contribute to the sustainability of the workplace and their business operations.

Designing Future Society for Our Lives

Never before has there been such a profound awareness of what it truly means to "LIVE," and the importance of safety, health and well-being.

Join us in a global call for safety, health, and well-being, as we embark on a groundbreaking journey at EXPO 2025 OSAKA, KANSAI, JAPAN, where people from around the world come together to discuss and design the future society for our lives.

World Leaders Unite: Recognizing the Global Significance of Safety, Health, and Well-being

The Global Initiative for Safety, Health, and Well-being (GISHW) aims to establish 'Vision Zero for All' as a global citizen's initiative by 2030. As shown below, leading international organizations and enterprises are calling for safety, health, and well-being. The theme of EXPO2025, "Designing Future Society for Our Lives," aligns harmoniously with their messages. GISHW is committed to continuously enhance the safety, health and wellbeing of people worldwide and through international collaboration to contribute to the dissemination and flourishing of Vision Zero initiatives on a global scale.

Tedros Adhanom Ghebreyesus
WORLD HEALTH ORGANIZATION (WHO)
DIRECTOR GENERAL

The enjoyment of the highest attainable standard of physical, mental and social wellbeing is one of the fundamental rights of every person. @Vision Zero Summit 2022

Vanessa Harwood-Whitcher
INSTITUTION OF OCCUPATIONAL SAFETY AND HEALTH (IOSH)
CHIEF EXECUTIVE

With Activate 2028, we bring to the forefront the role OSH plays in enabling inclusive working environments where employees, feeling safe, and being safe are given equal attention and action.

Masao Mukaidono
INSTITUTE OF GLOBAL SAFETY PROMOTION (IGSAP)
CHAIRMAN

"Within the domain of occupational health and safety, the placement of well-being assumes a structured hierarchy. Initially, safety serves as the solid foundation, followed by health, and only then can well-being truly be safeguarded." (Safety, Health and well-being, SAFETY DIGEST Vol.68, No.11, pp.2-8, Japan Safety Appliances Association, November 2022)

Gilbert F. Hougbo
INTERNATIONAL LABOUR ORGANIZATION (ILO)
DIRECTOR GENERAL

Support workers and enterprises to improve work engagement and to promote decent work by implementing measures to reduce inequality;
Ensure occupational safety and health;
Promote health and well-being at work
(G7 Kurashiki Labour and Employment Ministers' Meeting, Okayama, Japan, April 23, 2023)

Mohammed Azman
THE INTERNATIONAL SOCIAL SECURITY ASSOCIATION (ISSA)
PRESIDENT

"Safety and Health is right for all workers. Hence, people are at the heart of the Vision Zero strategy. Vision Zero promotes joint responsibility of all actors in prevention to improve safety, health and wellbeing."
(Int'l Well-being Tech Forum, May 11, 2023)

Hans-Horst Konkolewsky
INTERNATIONAL ORP FOUNDATION (FIORP),
PRESIDENT

"While risk prevention measures traditionally have been regarded as external obligations imposed on business by governments, companies nowadays have turned these into Key Performance Indicators for successful leadership and important contributors to corporate sustainability goals."
(Wellbeing in Practice" by Nikkei BP)

Stefan Olsson
EUROPEAN COMMISSION (EC)
WORKING CONDITION AND SOCIAL DIALOGUE
DIRECTOR

"The issue of statistics and knowledge about accidents and occupational diseases, of course, is crucial to the Zero Vision approach and EU policy on OSH in general."
(Vision Zero Summit 2022)

Sven Timm
CENTRAL PREVENTION DIVISION,
GERMAN SOCIAL ACCIDENT INSURANCE (DGUV)
DIRECTOR

"The German Social Accident Insurance Institutions are to:
prevent occupational accidents, occupational diseases and work-related health hazards "with all suitable means"
(Int'l Well-being Tech Forum, May 11, 2023)

Audrey Tang
PUBLIC DIGITAL INNOVATION SPACE
DIGITAL MINISTER OF TAIWAN

"Taiwan's record of preventing deaths from Covid-19, which stands very close to Vision Zero"
(Vision Zero Summit 2022)

Siong Hin Ho
INTERNATIONAL ASSOCIATION OF LABOUR INSPECTION (IALI)
PRESIDENT

IALI believes that by adopting the concept and approaches of Vision Zero, Labour Inspection will be better equipped to be a change agent in helping stakeholders to achieve better safety and health outcomes in a more sustainable manner.
(Int'l Well-being Tech Forum, May 11, 2023)

Tommi Alanko
FINNISH INSTITUTE OF OCCUPATIONAL HEALTH (FIOH)
DIRECTOR OF OCCUPATIONAL SAFETY UNIT

"Vision zero has served as a common dominator and provided a platform for building collaboration for decent work and better safety worldwide. I do see a great opportunity to take safety health and well-being to the next level." (Vision Zero Summit 2022)

Bonnie Yau
OCCUPATIONAL SAFETY AND HEALTH COUNCIL (OSHC)
EXECUTIVE DIRECTOR

"Promote safety and health at work, including well-being, and cultivate a strong safety culture"

Concept

- People's Living Lab -

A laboratory for a future society

- 1 A space where 8 billion people from around the world will not only view exhibits but will co-create our future society.
- 2 Even before the Expo begins, an online platform for sharing challenges and solutions from around the world will be launched.
- 3 A place where the world's knowledge such as cutting-edge technology will be brought together, used to create new ideas, and shared, all to help resolve global issues facing mankind.

Sowing the seeds of Vision Zero

Global friends who have sowed the Vision Zero seeds
 (Logos of organizers, supporters, sponsors and speakers of the Vision Zero Summit 2022 Japan)

Plant a seed of Vision Zero

ビジョン・ゼロの
種を植える

The seed of VISION ZERO was first planted during the 2014 World Congress on Safety and Health at Work in Germany, driven by an ambitious objective of achieving zero accidents. Since then, collaborative efforts and actions, and the exchange of best practices and knowledge have been witnessed, propelling the movement as institutions, organizations, and companies embrace its mindset and expand the frontiers of its implementation.

Significant milestones include the issuance of the Vision Zero Tokyo Declaration for All during the Vision Zero Summit Japan 2022 and the announcement of the Global Initiative for Safety, Health, and Wellbeing and Beyond (GISHW) at the ORP Congress in 2023. Looking ahead to the SDGs' target year of 2030, GISHW envisions leveraging Expo2025 as a powerful platform to amplify the significance of safety, health, and well-being. Together with you, colleagues and friends, GISHW continues to strive for the safety, health, and well-being of global citizens.

Leaders' Voices

EXPO2025

At ORP Congress 2023 held in Bilbao, Spain from April 26 to 28, 2023, where more than 1,200 occupational health and safety professionals gathered from around the world, Dr. Fujita of the Institution of Global Safety Promotion explained how to leverage EXPO2025 to achieve the safety, health, and well-being of global citizens, which received great support from the audience.

Mr. Yoshikazu Tanaka of the Osaka Convention and Visitors Bureau conveyed the charms of Osaka and called for a visit to Japan on the occasion of EXPO2025, which drew great anticipation from the audience.

Mukaidono Safety Award

The Mukaidono Safety Award recognizes individuals and organizations that have dedicated themselves to enhancing and promoting industrial safety, inspired by Professor Dr. Masao Mukaidono's achievements and passion for this field in Japan. This prestigious award aims to encourage and honor those who have made significant contributions to maintaining, improving, advancing and spreading safety practices within the industrial sector. Its ultimate goal is to foster a culture of safety, not only among professionals involved in industrial safety but also to contribute to the promotion of safety at industrial sites in Japan and beyond.

Caution!

Safety

Safety + Well-being

Safety 0.0

Safety 1.0

Safety 2.0

The foreign delegates and other participants were offered a tour of the Kajiwara Tunnel construction site located on the Shin-Meishin Expressway, where they witnessed the extensive utilization of ICT (Information and Communication Technology) in prevention. They were greatly impressed by the comprehensive initiatives implemented at the site, placing a strong emphasis on the safety, health and overall well-being of the workers.

The team enjoyed being greeted by the autonomous mobile robot "Nyokkey" at the Kawasaki Heavy Industries' showroom in west Kobe. They witnessed industrial robots that collaborate with each other in collaborative tasks, and service robots that coexist with humans. They also had the opportunity to experience getting a portrait drawn by "duAro," the dual-armed SCARA robot, which can coexist and collaborate with humans.

At the visit to Medicaroid Corporation, a company that combines the technology of Kawasaki Heavy Industries' industrial robots with the expertise developed by Sysmex Corporation in the medical field, attendees had the opportunity to experience the operation of the surgical assistance robot system, "hinotori™ Surgical Robot System." The robotic assisted surgery system, which enables precise movements of the surgeon, received admiration from the delegate members, who expressed their belief that it should be utilized worldwide.

Construction sites have been stigmatized as "3D" workplaces - demanding, dirty, and dangerous. Why hasn't the number of deaths decreased? Unlike manufacturing plants, it is challenging to implement safety measures such as enclosing hazardous machinery. This eagerly awaited book, dedicated to the construction sector, explores effective strategies by "collaborative safety" in order to establish a safe and well-being environment.

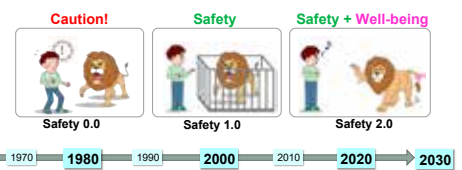

図表 1-15 「Safety 2.0 技術認証」を受けた、すり出し時の安全方策システム (筆者作成)

日本の考え方	欧米の考え方
災害は努力すれば、二度と起こらないようにできる	災害は努力しても技術レベルに応じて必ず起こる
・災害の主要因は人である ・技術的対策よりも人の対策を優先	・災害防止は技術的問題である ・人の対策よりも技術的対策を優先
管理体制をつくり、人の教育訓練をし、規制を強化すれば安全は確保できる	人は必ず間違いを犯すものであるから、技術力の向上がなければ安全確保はできない
労働安全衛生法で、人および施設の安全化を目指すし、災害が発生するたびに規制を強化	設備の安全化とともに、事故が起こっても重大災害に至らない技術的対策
安全は、基本的にただである	安全は、基本的にコストがかかる。安全は投資である
・安全にコストは認めにくい ・目に見える「具体的危険」に対して最低限のコストで対応し、起こらないはずの災害対策に、技術的深堀りはない	・安全にはコストをかける ・危険源を洗い出し、そのリスクを評価し、評価に応じてコストをかける。起こるはずの災害の低減化努力をし、さまざまな技術・道具が生まれた
・見つけた危険をなくす技術 (危険検出型技術)	・理論的に安全を立証する技術 (安全確認型技術)
度数率 (発生件数) の重視	強度率 (重大災害) の重視

IEC White Paper "Safety in the Future" published in November 2020

Compiled as an official document by IEC, a global standardization organization, this publication aims at establishing a foundation for safety in the future world. Spearheaded by the Ministry of Economy, Trade and Industry of Japan, the white paper involves editing by safety experts from around the world, emphasizing the collaborative interaction between humans, machinery, and the environment.

Vision Zero for All is an initiative that strives to enhance the safety, health, and well-being of all individuals, encompassing the estimated 8 billion citizens inhabiting our planet. "Designing Future Society for Our Lives" is the main theme of EXPO2025 to be held in Osaka, Japan in 2025. These objectives align perfectly with the Sustainable Development Goals (SDGs), which seek to establish a sustainable society by 2030, leaving no one behind.

The essence of human existence lies in interconnectedness and mutual assistance in various endeavors, including work (occupation). Ensuring a safe, healthy, and nurturing work environment has a profound impact on people's lives. When parents work in an environment that is both comfortable and safe physically and mentally, they return home with happiness and a smile, benefiting their partners and children. Similarly, contented employees operating in a comfortable workspace are more likely to create superior products, services, and innovations that contribute to the well-being of customers, society, and ultimately the company itself.

The potential for Vision Zero for All is boundless, as experts in occupational safety, health, and wellbeing from around the world collaborate and share their knowledge to cultivate a safer, healthier, and happier planet.

Join the Global Initiative for Safety, Health and Well-being @EXPO2025 and BEYOND
We cordially invite you to participate in the Global Initiative for Safety, Health, and Well-being @EXPO2025 and Beyond (GISHW). This initiative is dedicated to enhancing the safety, health, and overall well-being of the estimated 8 billion global citizens. We believe that achieving these goals requires expertise and knowledge not only in the field of occupational safety health, but also across various other domains.
During this initiative, numerous international and national institutions, organizations, companies, and citizen networks will come together to collaborate and contribute towards improving well-being—the ultimate aspiration of humankind. By actively engaging in this endeavor, you will have the opportunity to interact and network with like-minded individuals, fostering the development of your skill, expertise and business.
Your unique perspective, profound insights, and invaluable experiences are essential in shaping this shared vision. We humbly request your presence and active participation in this noble endeavor. Join hands with us to cultivate safer and healthier workplaces, ultimately contributing to a better, brighter world for all. Join the Global Initiative for Safety, Health, and Wellbeing (GISHW) @EXPO 2025 and Beyond today, as together, we can truly make a difference.

Contact us for inquiries and information regarding the Global Initiative for Safety, Health and Well-being @EXPO2025 & BEYOND.
